

What is claimed is:

---

1. (Amended) A method for providing a Web page to a receiving terminal, the method comprising:

generating a new Web page that has a display control program and data needed to operate the display control program added to a standard format Web page that is prepared beforehand, said display control program having been selected according to a display request received from a receiving terminal; and

transmitting the new Web page to the receiving terminal through a network.

A2  
Cmt  
2. (Not Amended) A method for providing a Web page according to claim 1, wherein the standard format Web page is used to display a quotation amount for a product by making a quotation calculation on the receiving terminal, and the necessary data is data including product information needed for said quotation calculation.

3. (Amended) A method for providing a Web page from a server on a server side of a network to a receiving terminal on a receiving side of the network, the method comprising:

generating a new Web page that has a display control program and data needed to operate the display control program added to a standard format Web page that is prepared beforehand, said display control program having been selected according to a capability of a receiving side; and

transmitting the new Web page to the receiving terminal through a network.

4. (Amended) A method for providing a Web page according to claim 3, wherein the server is informed by the user of the capability of the receiving side.

5. (Amended) A method for providing a Web page to a receiving terminal, the method comprising:

generating a new Web page that has a display control program and data needed to operate the display control program added to a standard format Web page that is prepared beforehand, said display control program having been selected according to a display format at the receiving terminal; and

transmitting the new Web page to the receiving terminal through a network.

6. (Amended) A method for providing a Web page to a receiving terminal, the method comprising:

generating a new Web page that has a display control program and data needed to operate the display control program added to a standard format Web page that is prepared beforehand, said display control program having been selected according to traffic on a network; and

transmitting the new Web page to the receiving terminal through the network.

7. (Amended) A method for providing a Web page to a receiving terminal, the method comprising:

generating a new Web page that has a display control program and data needed to operate the display control program added to a standard format Web page that is prepared beforehand, said display control program having been selected according to a selection condition corresponding to a capability of a network; and

transmitting the new Web page to the receiving terminal through the network.

8. (Amended) A method for providing a Web page to a receiving terminal, the method comprising:

generating a new Web page that has a display control program and data needed to operate the display control program added to a standard format Web page that is prepared beforehand, said display control program having been selected according to a selection condition corresponding to a load on a server; and

transmitting the new Web page to the receiving terminal through a network.

9. (Amended) A method for providing a Web page to a receiving terminal on a receiving side of a network, the method comprising:

generating a new Web page that has a display control program and data that is needed to operate the display control program added to a standard format Web page that is prepared beforehand to display a quotation amount for a product, said display control program having been selected according to a display request received from the receiving terminal and a capability of the receiving side, said data including product information for calculating the quotation amount; and

transmitting the new Web page to the receiving terminal through the network.

10. (Amended) A method for providing a Web page to a receiving terminal, the method comprising:

generating a new Web page that has a display control program and data that is needed to operate the display control program added to a standard format Web page that is prepared

beforehand to display a quotation amount for a product, said display control program having been selected according to a display request received from the receiving terminal and a display format of the receiving terminal, said data including product information for calculating the quotation amount; and transmitting the new page to the receiving terminal through a network.

11. (Amended) A method for providing a Web page to a receiving terminal, the method comprising:

A2  
Cm.t  
generating a new Web page that has a display control program and data that is needed to operate the display control program added to a standard format Web page that is prepared beforehand to display a quotation amount for a product, said display control program having been selected according to a display request received from the receiving terminal and traffic on a network, said data including product information for calculating the quotation amount; and

transmitting the new Web page to the receiving terminal through the network.

12. (Amended) A method for providing a Web page to a receiving terminal, the method comprising:

generating a new Web page that has a display control program and data that is needed to operate the display control program added to a standard format Web page that is prepared beforehand to display a quotation amount for a product, said display control program having been selected according to a display request received from the receiving terminal and a capability of a network, said data including product information for calculating the quotation amount; and

transmitting the new page to the receiving terminal through the network.

13. (Amended) A method for providing a Web page to a receiving terminal, the method comprising:

generating a new Web page that has a display control program and data that is needed to operate the display control program added to a standard format Web page that is prepared beforehand to display a quotation amount for a product, said display control program having been selected according to a display request received from the receiving terminal and a load on a server, said data including product information for calculating the quotation amount; and

transmitting the new page to the receiving terminal through the network.

14. (Amended) A system for providing a Web page to a receiving terminal, the system comprising:

Web page generation apparatus operable to select a display control program and data needed to operate the display control program according to a predetermined condition from a database, and to add the display control program and the data needed to operate the display control program to a standard format Web page that is prepared beforehand to generate a new Web page; and

communication apparatus operable to transmit the new Web page through a network to the receiving terminal.

15. (Amended) A computer readable storage medium with a program stored therein, the program operable to execute:

a process of selecting a display control program and data needed to operate the display control program according to a predetermined condition from a database;

A2  
cnclld. a process of adding the display control program and data  
needed to operate the display control program to a standard  
format Web page that is prepared beforehand to generate a new  
Web page; and

a process of transmitting the new Web page through a  
network to a receiving terminal.
